

Herb Deeks

Herb Deeks built a circus calliope from a vintage (1955) 1/48 scale Globe kit. He said it didn't take very long to build; But the joints were very tight and had to be scraped a bit to get some of the parts to seat properly. Herb lives in Anaheim and has been building models since he was a "wee lad." He builds a little bit of everything and always has something on the monthly contest table.
