

**Jim Harlow** prefers WWII-era aircraft and armor. He's holding a 1/72 scale T-6 Texan built from an MPC/Airfix kit. It was an older kit and there were the typical issues with fit. Jim is from La Habra and has built models off and on for most of his life. He returned to modeling about 3 years ago. There's always something going on the workbench and he completes about 10 models a year.
