

Terry Baylor won both First Place in the Masters Division and the Judge's Choice Award for his 1/32 scale Lukgraph-Poland Friedrichshafen .33L. The magnificently detailed aircraft was built from a resin kit. He said, "It took 180 hours to build because you have to do a lot of work to achieve the quality that you have in injection molded kits." Terry lives in Huntington Beach and has been building models for 72 years; he presently builds mostly WWI aircraft in 1/32 scale. He's able to create about 6 museum-quality models a year.
